

Tech Weaver Brand Guidelines

Logo

The Tech Weaver Solutions logo is a modern wordmark featuring a stylised and distinctive ‘W’ that represents the company’s identity as a technology-driven solutions provider.

This unique ‘W’ symbolises the weaving together of technology, innovation, and expertise, reflecting the company’s commitment to building seamless digital solutions that connect ideas with real-world outcomes.

Designed with simplicity and versatility in mind, the logo performs consistently across both light and dark backgrounds, with colour inversion available to ensure clarity and impact across a wide range of digital and print applications.

Logo Applications

The logo variations on the right demonstrate the versatility of the Tech Weaver Solutions visual identity across a wide range of digital and print applications. Each version has been carefully designed to maintain the integrity of the brand.

The Master Logo serves as the primary representation of the brand and should be used whenever space allows.

The Logo as Icon is a simplified adaptation of the master logo, designed for applications where a more compact visual is needed.

The Favicon is an optimised version created specifically for browser tabs, bookmarks, and other small-scale digital environments.

Together, these logo applications create a cohesive visual system that allows Tech Weaver Solutions to maintain a consistent and recognisable brand presence.

Clear Space

The Tech Weaver Solutions logo requires a dedicated clear space to preserve its visibility, legibility, and overall visual impact. This protected area ensures that no text, graphics, imagery, or other design elements interfere with the logo.

The clear space is determined by the proportions of the 'W' symbol and must be maintained consistently regardless of the logo's size.

No other visual elements should enter this exclusion zone, ensuring the logo retains its balance, integrity, and professional appearance.

Whether the logo is used in print, digital interfaces, presentations, signage, or marketing materials, maintaining the prescribed clear space helps reinforce a consistent brand identity and prevents visual clutter.

Logo Do's and Dont's

Do: use the logo in black or white, or the brand colour.

Don't: use any other colour that is not in brand book.

Do: use the logo in white against the brand colour.

Don't: distort the logo or transform in any way.

Logo Do's and Dont's

Don't: add any shadows to the logo.

Don't: overlay the logo on imagery in different colours.

Don't: rotate the logo in any degrees.

Don't: use against any other colour background.

Font

The font used across all Agile Institute entities is **Archivo Expanded**.

This modern and versatile typeface has been carefully chosen to reflect the brand's dynamic and forward-thinking identity.

Archivo Expanded offers a wide range of font weights and styles, allowing for flexible application across various formats, from digital to print.

Whether it's used for headlines, body text, or supporting copy, the typeface ensures a consistent and professional look that enhances readability and brand cohesion.

Colour Swatches

The Tech Weaver Solutions colour palette has been carefully selected to reflect the company’s innovative, modern, and forward-thinking approach to technology.

Together, these colours create a clean and professional visual identity that is both distinctive and highly versatile across digital and print applications.

Indigo is the cornerstone of the brand identity. Representing innovation, creativity, and digital transformation, it conveys confidence while reinforcing Tech Weaver Solutions’ commitment to building modern software and technology solutions.

The Indigo Pastel complements the primary purple by adding depth and flexibility to the visual system. It is intended for supporting elements such as backgrounds, illustrations, infographics, interface components, and subtle highlights.

Photography

Photography should capture individuals and teams collaborating, brainstorming, developing software, analysing data, or interacting with digital products.

The overall tone should be clean, contemporary, and professional, with natural lighting and authentic workplace settings. Images should feel approachable and genuine while reinforcing Tech Weaver Solutions' commitment to delivering reliable, user-focused digital solutions.

When using stock photography, priority should be given to images that portray authentic interactions, modern workspaces, and real moments of collaboration.

Imagery and Grades

Gradients should be created using the Tech Weaver Solutions brand colour palette, with Indigo (#742DE1) serving as the dominant colour.

Supporting colours may be incorporated to add dimension and visual interest, while ensuring the overall composition remains cohesive and unmistakably aligned with the brand.

For consistency, all gradient overlays should be applied at 80% opacity, allowing the underlying imagery to remain visible while ensuring the Tech Weaver Solutions brand colours remain prominent.

This approach preserves image clarity, maintains readability, and delivers a polished, contemporary visual experience across every touchpoint.
